

“I want that same
prompt-pay deal
you guys gave
the pharmacists.”

Doctors, hospitals and specialty providers will all be knocking down the door next year if Congress passes faster Medicare reimbursement rules for independent pharmacists.

Reimbursing pharmacists faster than other providers is more than just unfair. So-called “fast-track” pharmacy payments make stopping Medicare fraud, waste and abuse more difficult. What makes more sense is addressing the payment inequities for pharmacists under Medicaid AMP.

Medicare providers deserve a level playing field. That’s why PBMs pay pharmacy claims in the same 30-day reimbursement period that governs Medicare doctors and hospitals.
